Connect the projector to your laptop

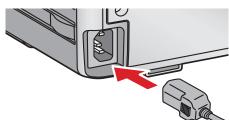

Locate the required cables:

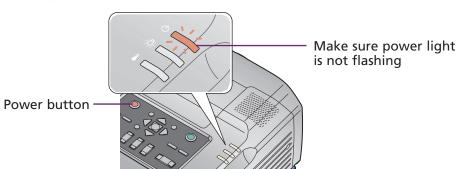

- Connect the other end to your laptop's video-out or monitor port.
- 4 Plug in the power cord.

Turn on your equipment

- Turn on your laptop.
- 2 Remove the projector's lens cover.
- 3 Make sure the Opower light is orange and not flashing.

4 Press the **O Power** button to turn on the projector.

CAUTION: Before unplugging the projector...

To shut down the projector properly

- 1. Press the O Power button twice. Let the projector cool while the power light flashes orange (about 45 seconds).
- 2. Once the light stops flashing and stays on, it's safe to unplug the projector.

Never unplug the projector when the \bigcirc power light is green or flashing orange.

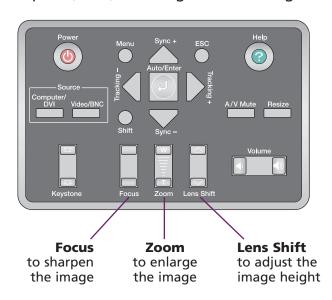

Follow these instructions to connect the projector to your laptop. For other setup options, see your *User's Guide*.

Adjust the image

If you've turned on your laptop and you don't see an image, press the Computer/DVI button on the projector to select Computer 1 as the image source.

NOTE: If you still see a blank screen or have other difficulties, see the troubleshooting tips on the back of this sheet.

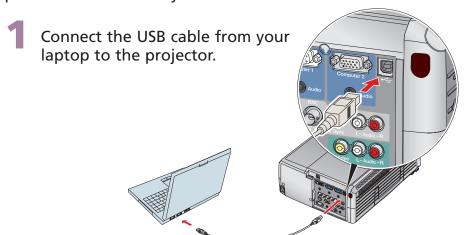

Adjust the sharpness, size, and height of the image:

- If your image looks like or or , you've placed the projector off to one side of the screen at an angle. Place it directly in front of the center of the screen, facing the screen squarely.
- 4 If your image looks like or or , use the **Keystone** button to square up the image.

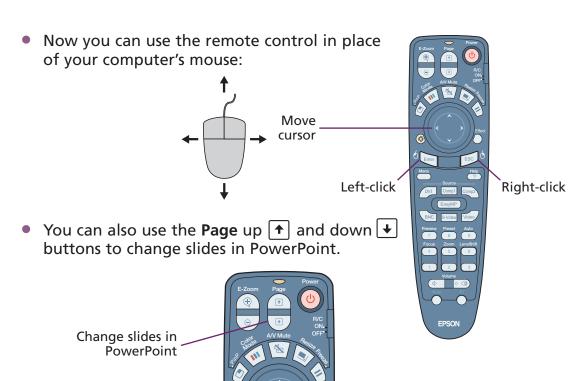

Using the remote control

You can use the remote control in place of your computer's mouse. This lets you control your computer and give slideshow-style presentations from anywhere in the room.

- If necessary, set up your laptop to work with a USB mouse.
- If this is your first time using the remote, make sure its batteries are installed. Then turn on the power switch on the side of the remote.

For more information on using the remote control, see your *User's Guide*.

Where to get help

Telephone Support Services

To use the EPSON PrivateLine® Support service, call (800) 637-7661 and enter the PIN on the EPSON PrivateLine Support card included in your *Start Here* kit. This service is available 6 AM to 6 PM, Pacific Time, Monday through Friday, for the duration of your warranty period. You may also speak with a projector support specialist by dialing one of these numbers:

U.S.: (562) 276-4394, 6 AM to 6 PM, Pacific Time,

Monday through Friday

Canada: (905) 709-3839, 6 AM to 6 PM, Pacific Time,

Monday through Friday

Toll or long distance charges may apply.

Electronic Support Services

EPSON provides technical assistance through electronic support services 24 hours a day at http://support.epson.com. For tips, templates, and training for developing successful presentations go to http://www.presentersonline.com.

Troubleshooting If you see a blank screen...

If you see a blank screen or the **No signal** message after turning on your laptop, check the following:

- Make sure the power light on the projector is green and not flashing, and the lens cover is off.
- No signal (② Help)
- Press the Computer/DVI button on the projector to select Computer 1 as the image source.
- If you're using a Windows laptop, press the function key on your keyboard that lets you display on an external monitor. It may be labelled CRT/LCD or have an icon such as 母(□). You may have to hold down the Fn key while pressing it. Allow a few seconds for the projector to sync up after changing the setting.

If the projector and laptop don't display the same image...

If your image displays either on the projector or laptop, but not on both, check the following:

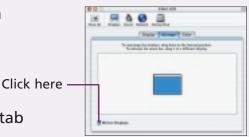

Windows

Try using the **CRT/LCD** or \triangle function key as described above. On most systems, this key lets you toggle between the LCD screen and the projector, or display on both at the same time.

If that doesn't work, check your monitor settings to make sure both the LCD screen and the external monitor port are enabled. From the Windows Control Panel, open the **Display** utility. In the Display Properties dialog box, click the **Settings** tab, then click **Advanced**. The method for adjusting the setting varies; you may have to click a **Monitor** tab, then make sure the external Monitor port is set as your primary display and/or enabled. See your laptop's manual or online help for details.

Macintosh OS X

- 1. From the Apple menu, select **System Preferences**, then select **Displays**.
- 2. Select the **Color LCD** dialog box.
- Click the Arrange (or Arrangement) tab and click Mirror Displays.

Macintosh OS 9.x or earlier

- 1. From the Apple menu, select Control Panels, then click Monitors or Monitors and Sound.

 Drag one monitor icon on top of the other
- 3. Drag one monitor icon on top of the other.

If the **Arrange** option isn't available, click the **Monitor** icon and select a **Simulscan** resolution.
